

Agenda (15 min presentation, 5 min discussion)

Date, Time	Speaker
Thu, 11.03.2021	
10:00-10:20	Daniel Andergassen, Institute of Pharmacology and Toxicology, Technical University of Munich "Decoding the non-coding genome, one allele at a time"
10:20-10:40	Zhifen Chen, Deutsches Herzzentrum München, Technical University of Munich "Functional validation of LncRNAs identified by transcriptome wide association study of CAD"
10:40-11:00	Donato Santovito, Institute for Cardiovascular Prevention, Ludwig-Maximilians-Universität Munich "Autophagy unleashes noncanonical microRNA features"
Fri, 12.03.2021	
10:00-10:20	Wesley Abplanalp, Institute of Cardiovascular Regeneration, Goethe University Frankfurt "Broadening applications for anti-miR-92a therapy and the discovery of novel ncRNA associations with health and disease."
10:20-10:40	Sebastian Cremer, Institute of Cardiovascular Regeneration, Goethe University Frankfurt "MALAT1 and hematopoiesis after MI"
10:40-11:00	Ankita Garg, Institute of Molecular and Translational Therapeutic Strategies Hannover Medical School "Mir-181a: A novel regulator of Aldosterone-Mineralocorticoid Receptor mediated cardiac remodelling"
